Summary

Junior developer with a background in Cognitive Science from Simon Fraser University and a Full-Stack Developer certificate from Tecnológico de Monterrey. Proficient in the MERN stack and RESTful APIs, with a passion for problem-solving, creativity, and building user-friendly applications. Experienced working in diverse, multidisciplinary teams and adapting quickly to new environments. Eager to contribute and grow in a dynamic, innovative tech setting.

Technical Skills

- Markup & Style Languages: HTML, CSS (Advanced)
- Programming Languages: JavaScript (Intermediate), Python, C# (Beginner)
- Frameworks & Libraries: Tailwind, Bootstrap, Node.js, Express.js, React, GraphQL (Intermediate)
- Databases: SQL, MongoDB (Intermediate)
- Development Tools: Postman, Insomnia, Git, GitHub, npm, Linux commands, Heroku, Figma
- Creative/Interactive Tools: Unreal Engine, Unity, HTC Vive Pro Eye Tracking, TouchDesigner (Beginner)

Soft Skills

Critical Thinking, Problem-Solving Teamwork & Collaboration, Effective Communication, Adaptability, Creativity

Experience

Full Stack Mobile App Developer

September 2024 – Ongoing | Freelance, Mexico City, Mexico

- Independently developing a full-stack mobile app for gym and CrossFit management, focusing on building a user-friendly interface and smooth backend functionality.
- Collaborated with clients to understand their needs and deliver custom solutions, ensuring the app aligned with their business goals.
- Used React Native, Vue, SQL, and GraphQL to build the app's architecture, including frontend, backend, and database management.
- Utilized problem-solving skills to address performance issues and optimize the app for efficiency.

Kitchen Manager

July 2023 – December 2023 | Originals Mexicano, Coquitlam, BC, Canada

- Optimized kitchen operations using algorithmic approaches, which led to a 15% reduction in customer wait times and a 4% increase in profitability.
 - Collaborated with management to develop a cost-reduction strategy, proposing the implementation of inventory management software to automate ordering processes and improve cost control
 - Worked closely with management on creative menu development and strategic cost reduction efforts.
-

Projects

Tech Blog | [Project Repo](#) | [Deployed app](#)

- Developed a CMS-style blog that enables users to publish, edit, delete, and comment on posts. Integrated user authentication and managed database interactions using the MVC architecture.
- Tools/Languages: Node.js, Express.js, MySQL, Sequelize, Handlebars.js, bcrypt, Heroku

Social Network Backend | [Project Repo](#) | [Link to demo](#)

- Designed and built a social network backend that enables users to share posts, manage profiles, and interact with friends via likes, comments, and friend requests.
 - Implemented RESTful APIs and optimized data storage and retrieval processes using MongoDB and Mongoose.
 - Tools/Languages: Node.js, Express.js, MongoDB, Mongoose, Insomnia
-

Education

Full-Stack Developer Bootcamp

December 2023 – June 2024 | Tecnológico de Monterrey, Mexico City, Mexico

- Completed an intensive bootcamp covering both frontend and backend development, focusing on industry best practices and modern web technologies.
- Gained practical experience building real-world applications using JavaScript, React, Node.js, and databases such as SQL and MongoDB.

Cognitive Science, B.A. (In Progress)

2018 – 2026 | Simon Fraser University, Vancouver, Canada

- Studied an interdisciplinary approach combining philosophy, computer science, linguistics, and psychology to understand mind and behavior.
- Focused on embodied cognition and how technology interacts with cognitive processes, particularly through research in AR/VR technologies.
- Gained a broad understanding of cognitive modeling, problem-solving frameworks, and computational approaches to human behavior
