Summary

Junior developer with a background in cognitive science from Simon Fraser University and a full-stack developer certificate from Tecnológico de Monterrey. Experienced with the MERN stack and RESTful APIs. An innovative problem-solver passionate about web development, focused on creating efficient, user-friendly applications. Strengths include adaptability, quick learning, and strong communication. Eager to collaborate and grow in a dynamic tech environment.

Technical Skills

Markup and Style Languages (Advanced): HTML, CSS

Programming Languages: JavaScript (Intermediate), Python (Beginner)

Frameworks & Libraries (Intermediate): Tailwind, Bootstrap, Node.js, Express.js, React, GraphQL

Databases (Intermediate): SQL, MongoDB

Development Tools (Intermediate): Postman, Insomnia, Git, GitHub, npm, Linux commands, Heroku, Figma

Soft Skills

Critical Thinking, Effective Communication, Problem-Solving, Adaptability, Ability to Learn, Creativity, Teamwork, Conflict Resolution, .

Experience

Full Stack Mobile App Developer

July 2024 – Ongoing

Freelance, Mexico City, Mexico

- Independently developing a gym/CrossFit mobile application, leveraging critical thinking and problem-solving skills to design and implement full-stack solutions.
 - Communicating directly with the client to understand requirements and deliver a user-centric product.
 - Responsible for full-stack development, including frontend, backend, and database management.
 - Designing the app architecture and selecting the technology stack (React Native, SQL, Vue, GraphQL).
-

Projects

E-commerce Backend | [GitHub](#)

- Developed a backend system for an e-commerce application that manages products, users, and orders.
- Designed and implemented RESTful APIs, integrated database operations, and ensured efficient handling of CRUD operations.
- Tools/Languages Used: Node.js, Express.js, MySQL, Sequelize, SQL, Insomnia

Tech Blog | [GitHub](#)

- Created a CMS-style blog application that allows users to publish, edit, and delete posts, as well as comment on other users' posts.
- Developed the application using the MVC architecture, implemented user authentication, and handled database interactions.
- Tools/Languages Used: Node.js, Express.js, MySQL, Sequelize, Handlebars.js, bcrypt, Heroku
- <https://mvc-tech-blog-c14-e548a60e466b.herokuapp.com/>

Social Network Backend | [GitHub](#)

- Developed a backend for a social network application that enables users to share posts, interact with friends, and manage their profiles.
 - Designed and implemented RESTful APIs for user interactions and post management. Integrated database operations and ensured efficient data retrieval and storage.
 - Implemented functionality for likes, comments, and friend requests.
 - Tools/Languages Used: Node.js, Express.js, MongoDB, Mongoose, Insomnia
-

Education

Combining foundational knowledge in cognitive science with intensive technical training in web development, creating a unique skill set for the tech industry.

Full-Stack Developer Bootcamp

Tecnológico de Monterrey, Mexico City, Mexico (December 2023 – June 2024)

- Intensive program covering frontend and backend web development.
- Gained hands-on experience with modern web technologies and industry best practices.

Cognitive Science, B.A. (In Progress)

Simon Fraser University, Vancouver, Canada (2018-2026)

- Studied an interdisciplinary approach to understanding mind and behavior.
- Developed critical thinking and problem-solving skills applicable to software development.
